**the future
is now**

This groundbreaking new textbook illustrates how biotechnology has radically changed the way we think about health care.

MedicalBiotechnology

Bernard R. Glick Cheryl L. Patten Terry L. Delovitch

Medical Biotechnology illustrates how biotechnology has radically changed the way we think about health care. In this jargon-free, easy-to-read textbook, the authors demystify the discipline of medical biotechnology and present a roadmap that provides a fundamental understanding of the wide-ranging approaches pursued by scientists to diagnose, prevent, and treat medical conditions.

Medical Biotechnology is written to educate:

- Pre-med and medical students
- Dental students
- Pharmacists
- Optometrists
- Nurses
- Nutritionists
- Genetic counselors
- Hospital administrators
- Anyone who needs to understand how biotechnology is advancing and impacting modern medicine

praise for MedicalBiotechnology

"Medical Biotechnology will be an essential textbook for senior undergraduate and postgraduate courses in biotechnology in many universities."

Michael Butler
